184 IW SAFETY FLASH May 2018

Safety and Yard Work

Yard work! For the average person these two words can either mean dread or enjoyment. Like it or not, it is a necessary evil for most of us. Regardless, safety needs to be a major part of your activities.

As you plan your yard work, remember these simple points.

- Always wear the recommended protective gear for the equipment being used. Safety glasses, hearing protection, long pants and safety shoes should be standard protective equipment when using a lawn equipment.
- Always inspect the area before starting work. Be mindful of branches, stones, glass or other debris that could pose additional hazards. Make sure people are not in the area while you are working to avoid injury due to flying objects.
- Never add fuel to hot equipment. Gasoline could be ignited by the hot surface of an exhaust pipe or engine. Always add fuel to equipment in a well ventilated area and properly store the fuel away from direct sunlight or other heat sources.
- Keep chemicals away from children and pets. Know the chemicals that you are using and protect yourself with the proper PPE.

Regardless of your view of yard work, if you make safety a part of your experience you can sit back, sip your lemonade and enjoy the results of your hard work.

Chief of Safety: Maj Forrest, 759-7040

Safety Superintendent: SMSgt Knaak, 759-7042
